

ICT LearnX

Customer Research & MVP Roadmap

PRODUCT	STAGE	MARKET	DATE
ICT LearnX	Pre-Seed Idea	Pakistan EdTech	June 2026

1. EXECUTIVE SUMMARY

ICT LearnX is an AI-powered ICT learning platform targeting Pakistan's secondary and tertiary students. Extracted from the Startup Validation Report, this blueprint defines the ideal customer, MVP scope, prioritization, pricing, and 30-day launch plan. Verdict: **Promising but Unvalidated** — strong problem signal, zero live users, needs rapid field validation before build.

Startup Idea	AI-powered ICT learning platform — personalized, gamified, Pakistan-curriculum-aligned
Core Problem	Theory-heavy, non-interactive, no feedback, no local curriculum alignment in ICT education
Target Customers	School/college students (15–24), BS-CS students, ICT institutes, teachers
Competitors	Khan Academy, Coursera, Sabaq Foundation, ilmkidunya — none own the ICT niche in PK
Validation Status	No users yet — idea stage. Strong personal + anecdotal problem signal from founder.
Market	Pakistan primary; 18% CAGR EdTech; TAM ~\$2B; SOM ~\$1.8M Year 1

2. IDEAL CUSTOMER PROFILE (ICP)

Primary ICP — B2C Student

Attribute	Detail
Age / Gender	15–24 / All genders — ICT subject students
Education Level	Matric, FSc, A-Level, BS Computer Science or IT
Geography	Urban + semi-urban Pakistan: Karachi, Lahore, Islamabad, Peshawar, Multan, Hyderabad
Device	Android smartphone (primary), occasional laptop
Internet	Mobile data (3G/4G); 60%+ Pakistan urban internet penetration
Motivation	Board exam prep, skill building, career readiness, peer competition
Budget	PKR 0–800/month; parents approve small subscriptions for education
Decision Maker	Student self-selects; parents pay for premium tiers
Buying Trigger	Failed class test, upcoming board exam, peer recommendation
Channel	YouTube, WhatsApp study groups, Google Search, TikTok

Secondary ICP — B2B Institution

Attribute	Detail
Org Type	Private ICT institutes, computer labs in schools, coaching centers
Geography	Tier 2–3 cities; limited qualified ICT teaching staff
Size	50–2,000 enrolled students
Decision Maker	Principal, Head of ICT Dept, IT Coordinator
Budget	PKR 30,000–150,000/year institutional license
Trigger	Poor board results, teacher vacancy, semester start, board inspection
Pain	Shortage of ICT teachers; manual quiz/assessment overhead

3. BUYER PERSONAS

	Persona 1: Ahmed	Persona 2: Zara	Persona 3: Sir Rizwan
Role	FSc Student (Matric/FSc)	BS-CS Student (Yr 2)	ICT Department Head
Age / City	17 / Multan	20 / Islamabad	42 / Faisalabad
Goal	Pass BISE board exams	Build fundamentals for internship	Improve results, reduce workload
Frustration	Teacher rushes networking; no practice	MOOCs too expensive, not aligned	No qualified ICT staff; manual quizzes
Budget	PKR 0–300/mo	PKR 500–1,000/mo	PKR 50K–120K/yr (inst.)
Channel	YouTube, WhatsApp	LinkedIn, Discord, GitHub	EdTech expos, WhatsApp teacher groups
Buy Trigger	Failed class test before finals	Internship rejection	Poor previous board results
Objection	'I can use YouTube for free'	'Is this FBISE aligned?'	'Our LMS already exists'

4. TOP 10 CUSTOMER PAIN POINTS

#	Pain Point	Segment	Severity	Frequency
1	Cannot practice ICT concepts interactively	Students	Critical	Daily
2	No personalized feedback on weak topics	Students	High	Weekly
3	Expensive / irrelevant foreign MOOCs	Students	High	Ongoing
4	Content not aligned to FBISE / HEC curriculum	Students	High	Ongoing
5	No AI tutor available in English/Urdu for ICT	Students	High	Daily
6	Boring passive content causes high dropout	Students	High	Ongoing
7	Manual quiz creation is time-consuming	Teachers	High	Weekly
8	No visibility into student progress	Institutes	High	Ongoing
9	Shortage of qualified ICT teaching staff	Institutes	Critical	Every semester
10	No gamified learning for technical subjects in PK	Students	Medium	Ongoing

5. CUSTOMER JOURNEY

Stage	Touchpoint	Emotion	Platform Response	KPI
Awareness	Social media / peer share / YouTube search	Frustrated with current tools	Demo reel, SEO content, peer testimonials	Unique visitors
Consideration	Visit site, try free quiz / AI demo	Curious but skeptical	Free quiz, AI tutor trial, feature tour	Sign-up rate
Onboarding	Register, take skill assessment	Hopeful	Personalised learning path + first XP earned	Assessment completion %
Activation	Complete first lesson + quiz	Engaged — sees value	Gamified XP, streak, weak area surfaced	Day-1 & Day-7 retention
Habit	Daily challenges, streak maintenance	Motivated	Leaderboard, notifications, peer comparison	30-day retention
Purchase	Free tier limit, premium preview	FOMO — wants more	Smart upgrade prompt, PKR-friendly payment	Free-to-paid %
Retention	Weekly revision, AI tutor re-use	Reliant, confident	Personalised reminders, new content drops	Monthly active users
Advocacy	Share score, invite friends	Proud	Certificates, referral rewards	K-factor (virality)

6. KEY CUSTOMER OBJECTIONS & COUNTERS

Objection	Counter-Response
"I can use YouTube for free"	YouTube is passive; LearnX is interactive. Quizzes + AI feedback drive 3x better retention.
"I can't afford a subscription"	Free tier gives full value. Premium at PKR 299/mo = less than a mobile data bundle.
"My internet is slow"	Offline mode planned for lessons. Core content optimised for low-bandwidth.
"How do I know it works?"	Free trial + public leaderboard + peer reviews. First 1,000 users = lifetime free.
"Not aligned to my board"	Built specifically for FBISE, BISE Punjab, BISE KPK. Local by design.
"We already have an LMS"	LearnX complements existing systems — zero IT overhead. ICT-specific, not generic.
"AI tutor will give wrong answers"	Answers scoped to ICT curriculum only. Humans review edge cases in v1.

7. KEY BUYING TRIGGERS

Trigger	Segment	Timing	Priority
Board exam 1–2 months away	B2C Students	Jan–May, Sep–Nov	★★★★★
Failed / underperformed in class test	B2C Students	Any time	★★★★★
Peer recommendation ('my friend uses it')	B2C Students	Anytime	★★★★■
New academic semester starting	B2B Institutes	Feb, Sep	★★★★★
Poor previous year board results	B2B Institutes	Post-results	★★★★★
Teacher vacancy / shortage	B2B Institutes	Any time	★★★★■
Viral demo / testimonial on social media	B2C + B2B	Anytime	★★★★■
Free tier delivers visible value	B2C Students	Day 1–7	★★★★■

8. MVP RECOMMENDATION

What to Build First (v1 — 60-Day Scope)

Feature	Why First	Effort	Impact
AI ICT Tutor (text Q&A;, concept explainer)	Most differentiated; no competitor has it in PK	Medium	★★★★★
Adaptive Quiz Engine (MCQ + instant feedback)	Core value prop; solves daily pain; easy to measure	Medium	★★★★★
Progress Tracker (topic mastery + weak areas)	Retention driver; shows ROI to student + parent	Low	★★★★■
FBISE/BISE Curriculum Topic Map	Foundation for all content; required for alignment	Low	★★★★★
Onboarding Skill Assessment	Personalisation from day 1; increases activation	Low	★★★★■

What NOT to Build in v1

Do not build yet: Gamified mini-games (high effort, low retention proof) · Voice AI Tutor · Multi-language Urdu support · Teacher/Institution dashboard · Certification system · Mobile app (web-first) · Leaderboard · Daily challenges · Recommendation engine · Social/community features. These are v2–v3 features. Building them now = scope creep = delayed launch.

MVP Success Metrics (90-Day Targets)

Metric	Target	Why It Matters
Waitlist signups (pre-launch)	500+ signups	Validates demand before a line of code
Day-7 user retention	≥ 40%	Proves habit formation potential
Day-30 user retention	≥ 20%	EdTech benchmark; below = product problem
Free-to-paid conversion	≥ 5%	Validates willingness to pay
Institutional pilots	≥ 2 paying	Validates B2B revenue model
AI Tutor satisfaction (CSAT)	≥ 4.0/5.0	Core feature quality signal
Quiz completion rate	≥ 60%	Engagement quality proxy

9. MOSCOW PRIORITIZATION

MUST HAVE	SHOULD HAVE	COULD HAVE	WON'T HAVE (Now)
• AI ICT Tutor (text Q&A;) • - Adaptive MCQ Quiz Engine • - Instant feedback + explanations • - FBISE/HEC curriculum map • - Skill assessment (onboarding) • - Progress tracker (topic mastery) • - User auth + profile • - Mobile-responsive web UI	• XP points + learning streaks • - Weak area identification • - Revision flashcards + cheat sheets • - Email/push reminders • - Dark mode • Basic admin dashboard	• Leaderboard • - Daily challenges • - Mini educational games • - Urdu language toggle • - Parent view of progress • - Shareable score cards	• Voice AI Tutor • - Mobile native app (iOS/Android) • - Teacher LMS portal • - Certification engine • - Social/community features • - Video lesson production • - Recommendation engine (v1)

10. PRICING HYPOTHESIS

Tier	Price	Included	Target Segment
Free	PKR 0/mo	10 AI tutor queries/day, 5 quizzes/day, basic progress view	All students — growth engine
Student Pro	PKR 299–499/mo	Unlimited AI tutor, all quizzes, full analytics, flashcards, streaks	Serious exam preppers
Student Premium	PKR 699–799/mo	Pro + gamified labs, priority AI responses, revision packs	Power users / repeat customers
Institution Lite	PKR 30,000–50,000/yr	Up to 100 students, quiz dashboard, teacher analytics	Small schools / coaching centers
Institution Pro	PKR 80,000–150,000/yr	Unlimited students, custom curriculum, white-label option	Large institutes + school chains

Pricing Note: Start with Free + Student Pro only. Do not launch all tiers simultaneously. Validate B2C conversion at PKR 299 first (lowest friction). Introduce B2B pricing after first 2 institutional pilots. Annual billing = 2 months free = higher LTV.

11. TOP 5 RISKS

#	Risk	Likelihood	Impact	Mitigation
1	Low user retention — students don't form daily habit	Medium	Critical	Duolingo-style streak mechanics; daily 5-min challenge; push notifications
2	Monetisation failure — students refuse to pay	Medium	High	B2B institutional as primary revenue; B2C freemium is growth, not cash
3	Founder bandwidth — student + founder burnout	High	High	Strict MVP scope; semester-aware sprints; consider 1 part-time co-founder
4	Well-funded competitor enters Pakistan market	Low	Critical	Move fast; community moat; B2B sticky contracts; first-mover brand
5	AI API cost exceeds early revenue	Medium	Medium	Rate-limit free tier; cache common queries; optimise prompts for cost

12. 30-DAY MVP PLAN

Week	Focus	Key Actions	Deliverable
Week 1 Days 1–7	Discovery	Interview 20 students · Survey 50+ via Google Form · Map FBISE ICT curriculum topics	Pain validated · Curriculum outline · Feature priority list
Week 2 Days 8–14	Define + Design	Lock MVP to 4 features · Build Figma/HTML prototype · Define success metrics	Clickable prototype · MVP spec doc · KPI dashboard setup
Week 3 Days 15–21	Test + Pitch	Test prototype with 10 students · Approach 3 institutes for pilot · Set up waitlist page	Usability feedback · 1 pilot LOI · 100 waitlist signups
Week 4 Days 22–30	Decide + Build	Analyse all feedback · Start AI Tutor API integration · Draft 1-page pitch	GO/PIVOT/STOP decision · AI tutor v0 · Investor teaser ready

13. FOUNDER ACTION SHEET — TOP 10 NEXT ACTIONS

#	Action	Deadline	Priority
1	Conduct 20 student interviews (WhatsApp/in-person) — validate top 3 pain points	Day 5	Critical
2	Run 50-person Google Form survey — WTP, feature ranking, platform habits	Day 7	Critical
3	Map FBISE + BISE KPK full ICT syllabus into topic tree	Day 7	Critical
4	Build clickable HTML/Figma prototype (AI Tutor + Quiz + Tracker)	Day 15	High
5	Test prototype with 10 target students; collect structured feedback	Day 18	High
6	Launch simple waitlist landing page — collect emails before build	Day 10	High
7	Contact 3–5 private ICT institutes for pilot conversation	Day 20	High
8	Post 60-second demo video on TikTok, YouTube Shorts, LinkedIn	Day 21	Medium
9	Research LUMS NEST I/O, Plan9, NIC Pakistan for incubation	Day 25	Medium
10	Week 4 retrospective: GO / PIVOT / STOP decision based on data	Day 30	Critical

14. SCORES (0–100)

Customer Clarity		72/100
Problem Severity		88/100
PMF Potential		74/100
MVP Readiness		68/100
Competitive Position		80/100
Monetisation Clarity		62/100
Founder-Market Fit		78/100

15. FINAL VERDICT

FINAL VERDICT

Promising but Unvalidated

Signal	Status	Notes
Problem is real	Confirmed	88/100 severity; founder is the user; widespread frustration documented
Market exists	Confirmed	Pakistan EdTech TAM ~\$2B; 18% CAGR; no ICT-specific competitor
ICP is clear	Defined	3 personas built; B2C + B2B segments identified
Users validated	Anecdotal	0 live users; 0 surveys; founder intuition only — must validate in Week 1
Willingness to pay	Assumed	PKR 299–799 hypothesis; not tested with real users yet
MVP scoped	Done	4-feature MVP defined; MoSCoW prioritisation complete

Signal	Status	Notes
Revenue model	■ Hypothesis	Freemium B2C + B2B institutional; untested; B2B recommended first

Bottom line: The idea has genuine merit. The problem is severe, the market is real, and the founder has strong domain fit. What's missing is user validation — no one has confirmed they'll use or pay for this yet. The next 30 days are entirely about validation, not building. Get 50 real students to confirm the pain. Get 2 institutes to express interest. Then build the smallest possible product that proves value. If Week 1 interviews confirm the problem at 80%+ rate — upgrade this to ■ **Strong Demand Signal**.
